

FEATURES

- The offset design provides maximum visibility for increased productivity and directs the chips and dust away from the operator, improving operator comfort.
- Both standard and high flow versions utilize high torque, direct-drive motors for maximum productivity.
- The hydraulic circuit on Universal stump grinders give metered flow to the control circuit without reducing the power to the cutting head.
- For ease of operation the stump grinders are mounted on stabilizer rollers. This allows the operator to position or reposition the grinder without operating individual stabilizers.

Specifications	328/00275	328/00276
Minimum Hydraulic HP	18	30
Swing Width	67"	67"
Swing Arc	90°	90°
Below Ground Depth	7.5 "	7.5 "
Above Ground Height	24"	24"
Wheel Diameter	21"	21"
Number of Teeth	16	32
Weight (lbs)	700	769

Part Number	160	170	180	180T	190	190T	1110	1110T
